# CURRENT CONCERN

The 2030 Agenda acknowledges that eradicating poverty in all its forms and dimensions, including extreme poverty, is the greatest global challenge and an indispensable requirement for sustainable development.

Earlier this year, the United Nations published a comprehensive report on the current worldwide situation. According to the report, the COVID-19 pandemic has so far cost the lives of close to 15 million people. But that's just the beginning of the pandemic's terrible impact.

# METHOD

There are numerous studies on the pandemic's impacts on poverty, but the growing discussions and research on the pandemic's effects on the Philippines' poverty rate offer a potential to produce new empirical evidence and knowledge on this subject. Therefore, carrying out empirical research is a suitable way to expand upon and investigate fresh research. The article's main goal is to analyze data on adaption strategies in the context of the Philippines and draw conclusions.
